# INDUSTRIAL VACUUM CLEANERS

FOR  
FOOD INDUSTRY

## Safe and efficient cleaning

To Keep ovens and production lines clean means to **prevent the contamination of the final product** with flour and burnt crumbs or other production wastes. Our industrial vacuum cleaners are the answer to all these activities and to several cleaning requirements in food industry.

These machines also can be demanded in **Zone 21 or 22 ATEX certified version** to safety by complying with european regulations.

## Certified safety

At Delfin, safety is not just a word, but a philosophy. Starting from the design up to the certification process, our goal is always to provide customers with state of the art, and totally **safe products**. This is to actually help you in your everyday work.

Aiming at always providing your with the proper industrial vacuum for every application, we have developed a wide and specific **ATEX certified** range of products for each of hazardous area.

	<b>Zone</b>	<b>Risk</b>	<b>Category</b>
	1	Occasional	2G
	2	Rare	3G
<b>Risk Zone ATEX</b>	21	Occasional	2D
	22	Rare	3D

All the machines are also available in **stainless steel 304-316 & ATEX version.**

# Maximize hygiene and quality of your products

**Side channel blower**  
suitable for ATEX Z22 area.

**Dustop filter cleaning system**  
using pressure differential

Polyester **cartridge filter**  
with high filtration efficiency

**Detachable container**  
for fast discharge

Available in  
**Single Phase**  
version

## Features

		802 WXP	202 DS 202 DS ECO T	Pharma 30	3535	DG 75	DG 200

## Filtration: your ally against contamination

In food industry, contamination is one of the most delicate issues. Before starting a new production cycle, it is mandatory to ensure that no allergen or particle shall contaminate the final product. To ensure this, filtration plays a key role (from 0.18 up to 3 microns).

According to the substances to be collected and their danger Delfin can provide **the most appropriate combination of filters** for all of its vacuum cleaners.

**Filtration:  
from 0,18 up  
3 microns**

## Other Delfin solutions in food industry

### Pneumatic Conveyors

Delfin pneumatic conveyors generate high vacuum levels thanks to the use of compressed air or electricity. This technology allows to obtain excellent performances while keeping low encumbrance and noise levels.

In food production, this completely closed system allows to zero the product dispersions during transport, **eliminating the risk of contamination** and maintaining the quality of the mixtures unaltered.

### Centralized vacuum systems

Delfin offers the most suitable solution to all food sector needs to do so, it provides a series of fixed pipes useful **remove and transport material from a point to another**, but also to accumulate and discharge them into a chosen point.

# ACCESSORIES & **OPTIONALS**

All Delfin vacuum cleaners and systems are made in Italy. Delfin has been designing and manufacturing vacuum solutions for food industries the all over last 25 years.

Delfin was founded over twenty years ago by the passion of its founder, Antonino Siclari, for the industrial vacuum sector.

Since then, he has never stopped working to offer its customers innovative and efficient solutions top quality, best designed, plus, he solves vacuuming problems for professionals and industries all over the world.
